

NK Emulator v1.0

- The **NK Emulator** device is designed to provide emergency access and start in vehicles equipped with keyless entry systems.

- Access to such vehicles is provided by using an original smart key emulator. The data for the emulator is calculated based on information obtained during the authorization procedure by touching the door handle (pressing the button).

SUPPORTED CAR BRANDS

Hyundai, Kia, Nissan, Infiniti, Mercedes, Renault – Europe (433 MHz)
(see list of supported models);

America (315 MHz) and Asia (314 MHz) - **not working** (expected in future updates).

THE KIT

- NK Emulator device;
- Smart key emulator (Kia, Hyundai, Nissan) – 3 pcs.

THE DEVICE OPERATION (step-by-step guide)

1. Turn on the device and approach the vehicle.
2. Press the door-handle button several times, holding the device **10–30 cm away**.
3. One vibration – the device received the required vehicle data.
4. Wait up to 15 seconds for the device to complete the calculation.
5. Three vibrations – calculation completed successfully.
6. Place the key emulator on the device.
7. One long vibration – emulator recorded successfully.
8. Turn off the device.
9. Use the emulator like the original key (10–30 cm away), **key buttons do not work (Keyless only)**.
